-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

- 1) first embodiment, Fig.8, a seal pattern between the second inorganic insulating layer and an inner surface of the second substrate (upper substrate), the seal pattern contacting the whole second inorganic insulating layer;
- 2) second embodiment, Fig.9E, a seal pattern on the second inorganic insulating layer, and the seal pattern contacts the first inorganic insulating layer through a groove;
- 3) third embodiment, Fig.10F, a seal pattern on the second inorganic insulating layer, and the second inorganic layer contact the first inorganic insulating layer through a groove;
- 4) fourth embodiment, Fig.11D, a seal pattern on the second inorganic insulating layer, and the seal pattern contacts the first inorganic insulating layer through multiple grooves;
- 5) fifth embodiment, Fig. 12E, a seal pattern on the second inorganic insulating layer, and the seal pattern contacts the second inorganic insulating layer at sidewalls of the multiple grooves;
- 6) sixth embodiment, Fig. 13C, a seal pattern on the second inorganic insulating layer, and the seal pattern contacts a metal layer (to be same layer as gate electrode of TFT on the lower substrate) through multiple grooves;

7) seventh embodiment, Fig. 14C, a seal pattern on the second inorganic insulating layer, and the seal pattern contacts a metal layer (to be same layer as source and drain electrode of TFT on the first inorganic insulating layer, such as on the gate insulating layer) through multiple grooves;

8) eighth embodiment, Fig. 15, pixel layer on the organic insulating layer, and the seal pattern being formed on the pixel layer.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim appears to be generic.

2. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the

Art Unit: 2871

case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mike Qi whose telephone number is (571) 272-2299. The examiner can normally be reached on M-T 8:00 am-5:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robert Kim can be reached on (571) 272-2293. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
